Kushtrim Arifi

Senior Product Designer I Behavioral Design & UX Research

kushtrimarifi.com I +383 49 210 999 I info@kushtrimarifi.com LinkedIn I GitHub Prishtina, Kosovo

PROFESSIONAL PROFILE

I look at digital product development through the lens of human behavior. With over 10 years of experience spanning UX research, product design, UX architecture, and front-end development, my work focuses on understanding how people think, make decisions, and interact with digital systems. I have delivered over 60 websites, applications, and digital projects, including more than seven years working remotely with Swiss companies.

My background in Clinical Psychology brings an additional perspective to understanding human cognition, behavior, and decision-making throughout the design process.I investigate how users navigate information, interpret choices, and experience cognitive friction through user research, stakeholder interviews, journey mapping, and usability testing. I translate these insights into clear information architectures, intuitive interaction patterns, Figma prototypes, and reusable design systems that simplify complex digital experiences.

Beyond design, I bring hands-on engineering experience that allows me to translate product decisions into working solutions. Using React, Next.js, TypeScript, and Supabase, I develop production-ready interfaces while maintaining consistency between research findings, design intentions, and technical implementation. This combination allows me to work across the entire product lifecycle, connecting human understanding with functional digital products.

CORE COMPETENCIES

Behavioral Design & UX Research: User Research, Behavioral Analysis, Usability Testing, Stakeholder Interviews, Cognitive Load, User Journey Mapping, Information Architecture.

Product Design & Prototyping: Interaction Design, User Flows, Wireframing, Figma Prototyping, Design Systems, Reusable UI Components, Accessibility, E-commerce UX.

Front-End Engineering: React, Next.js, TypeScript, JavaScript, Tailwind CSS, HTML, CSS, Responsive Interfaces.

Back-End & Delivery: Node.js, Laravel, PHP, Supabase, MySQL, PostgreSQL, GitHub, Docker, Vercel, CI/CD.

SELECTED HIGHLIGHT PROJECT

Co-Founder & Product Design Lead I ArvenaAI - Mental Health Companion Kosovo I 2026

Co-founded ArvenaAI - an AI-powered mental health support product designed for Albanian-speaking adults, with a focus on accessible, non-emergency emotional support.

Led product UX architecture, translating psychological considerations into conversational interfaces, onboarding experiences, and interaction flows designed around clarity, user autonomy, and cognitive load.

Developed UX concepts for text and voice interaction, structured support exercises, and access to crisis resources, with attention to the needs of users experiencing emotional distress.

Worked on safety-related UX and conversational boundaries, including clear communication of the product's limitations and access to immediate-help resources.

Translated product flows and Figma prototypes into responsive React and Next.js interfaces, connecting psychological considerations, interaction design, and technical implementation.

EXPERIENCE

Monun AG | Senior Product Design Engineer — Switzerland (remote) | 2024 - Present

- Led UX architecture, product design, and development of a custom CRM, transforming complex workflows for account management, permissions, invoicing, recurring billing, and payments into intuitive dashboards and functional interfaces.
- Researched competing Swiss property platforms, then designed and developed an interactive real-estate application using Next.js, TypeScript, and Supabase, featuring map-based search, shareable filters, availability states, and property management workflows.
- Conducted stakeholder interviews and created user flows, wireframes, high-fidelity Figma prototypes, and design systems to establish clear information architecture and consistent interaction patterns.
- Led end-to-end UX/UI design for 10+ websites and digital projects, including administrative dashboards and content-management experiences that simplify complex tasks for non-technical users.
- Translated Figma designs into responsive, production-ready interfaces using React and reusable UI components, maintaining consistency between design systems and technical implementation.
- Managed usability and accessibility reviews, quality assurance, and product launches, implementing continuous deployment workflows that reduced deployment time by 40%.

Business Leaders AG | Product Designer & Interaction Framework Eng. — Switzerland (remote) | 2020 - 2024

- Conducted qualitative user research and targeted usability test sprints, analyzing data-driven behavior to systematically restructure complex information hierarchies, reduce navigation friction, and minimize cognitive strain.
- Designed and engineered over 20 responsive web applications and custom digital platforms within Figma, taking complete ownership of cross-device behavioral consistency, clean component patterns, and precise content layout scaling.
- Optimized transactional e-commerce checkout funnels and digital product paths, developing and deploying custom interactive components in JavaScript and React to eliminate user drop-off states and increase total conversion health.
- Built custom, modular frontend layouts structured around clear design system principles, empowering non-technical corporate marketing teams to safely manage complex content updates without breaking code architecture.

Mardal | Product Designer & WordPress Systems Specialist — Kosovo | 2018 - 2020

- Directed the design and implementation of 20+ responsive web platforms, taking ownership of the complete product cycle from early client research to custom theme configuration.
- Engineered editable content templates and custom layout architectures within WordPress, simplifying routine content administration and ecosystem updates for non-technical client teams.
- Re-architected navigation layouts and accessibility structures across client websites to optimize digital readability and reduce user cognitive strain.
- Conducted comparative market analysis and user discovery sessions, using behavioral insights to guide structural design choices and keep core workflows clear and intuitive.

Prior Marketing GmbH | Product Designer & WordPress Developer — Switzerland (remote) | 2015 - 2018

- Designed and deployed 16+ custom web properties for Swiss corporate clients, taking ownership of visual layouts, responsive behavior, and cross-device interface consistency.
- Coded custom page templates and visual architectures within the WordPress environment, streamlining content management while ensuring swift navigation performance across desktop, tablet, and mobile breakpoints.
- Defined comprehensive design systems, typography guidelines, and core visual style guides to align user needs with broader marketing and business conversion objectives.
- Conducted foundational user discovery and stakeholder reviews to structure clean layouts and content hierarchies, ensuring intuitive workflows from the very first design iteration.

EDUCATION

MSc. Clinical Psychology - AAB University - Kosovo | 2022-2026
BSc. General Psychology - FAMA University - Kosovo | 2016-2020
